

Master Your Clinical Trial Planning

Optimize Strategy, Control Costs, & Drive Precision in Early Trials

Is your next trial at risk of unforeseen delays or budget overruns?

Entering clinical trials is a major milestone, but evolving FDA requirements, complex protocols, and global site strategies introduce significant risk. With limited funding and high investor expectations, staying on time and within budget is critical for future investment and M&A readiness.

Launch with Precision. Optimize for Success.

Introducing the Clinical Planning & Study Start-up

Designed for biotechs preparing to launch or refine early-phase trials, this curated package delivers the insights and support you need to make confident, cost-effective decisions. It combines gold-standard clinical landscape intelligence, protocol refinement, KOL alignment and feasibility data to help you plan smarter and execute with precision.

With Clinical Planning & Study Start-up, you will:

Strategically Position Your Trial

Understand the competitive landscape to shape a trial that's both scientifically sound and commercially viable.

Refine Protocol & Site Selection Strategy

Build a strong protocol and identify the right investigators and sites to support enrollment and execution.

Gain Budget & Timeline Clarity

Set realistic expectations and maintain control over costs and timelines.

Access to Expert KOLs

Identify and connect with KOLs who can support your trial and long-term development strategy.

Access Agile SME Support

Get expert guidance when you need it to navigate challenges and avoid costly rework.

**TRANSFORMING THE WAY
YOU SEE THE WORLD**

CITELINE.COM

Expanded Capabilities to Deepen Your Clinical Strategy

Enhance your clinical planning with targeted tools and expert insights:

Feasibility as a Service (FaaS)

Gain on-demand access to curated data and expert insights, with or without RWD, to support agile decision-making throughout development.

Curated Gold-Standard Clinical Intelligence Extracts

Leverage insights from TrialTrove+, SiteTrove+, Investigator SmartSelect, Protocol SmartDesign, Cohort Builder, Expert Finder and Site Compare to inform trial design and feasibility.

SME Advisory Support

Ongoing strategic input to help you adapt quickly and stay on track.

Patient Engagement and Recruitment (Optional)

For FIM/FIH/FIP trials, patient engagement solutions may be available based on assessment.

Expert Finder and Site Compare

Identify the most relevant experts and compare site performance to optimize site selection.

Accelerate Your Clinical Trial Readiness

Partner with us to build a smarter path to the clinic and set the stage for success.
