

# Revolutionize Clinical Trial Enrollment: Comprehensive Solutions

**Citeline Connect** focuses on successful patient engagement and recruitment with a comprehensive suite of patient- and data-driven technologies. This dynamic platform brings a network of 100+ recruitment partners together with clinical trial sponsors, patients, and healthcare providers.

## Here's how it works:

### Enrollment

Launch a patient recruitment campaign, prescreen, and direct participants to their preferred study site, centrally manage all recruitment and engagement, and prevent drop-off and delays with data-driven insights all in one place. Now that's engaging.

### Awareness

Lab Alerts enables near real-time notifications on study-specific positive lab results so study sites can quickly screen potentially eligible patients for your trial.

### Control

Our Trial Portfolio Website solution gives you an enterprise-level website that clinical trial sponsors use to educate/raise awareness of clinical trials and diseases, engage/recruit patients, communicate with stakeholders (patients, HCPs, caregivers, the public), and uphold clinical trial transparency commitments.
